

Job Title: Software Development Engineer (SDE) Intern

Location: Sector-67, Mohali (Work from Office)

Internship Duration: 6 Months

Employment Type: Internship (Full-Time)

About Growth Natives

Growth Natives is a global digital growth partner that helps businesses accelerate their digital transformation through Marketing Technology, AI, Data & Analytics, Digital Experience, and Software Engineering solutions. We work with leading global brands to build innovative, scalable, and high-performing digital products that drive business growth.

At Growth Natives, we foster a culture of continuous learning, innovation, collaboration, and ownership. As an intern, you'll have the opportunity to work alongside experienced engineers, contribute to live projects, and gain hands-on experience with modern technologies in a fast-paced environment.

About the Role

We are looking for enthusiastic and motivated Software Development Engineer (SDE) Interns to join our engineering team. This internship is designed for students and recent graduates who are passionate about software development and eager to build real-world applications while working alongside experienced developers.

Interns will gain hands-on experience in modern web technologies, collaborate on live projects, and contribute to building scalable digital solutions.

High-performing interns will be considered for a full-time Software Development Engineer (SDE) role upon successful completion of the internship, based on individual performance and business requirements.

Internship Tracks

Frontend Development

- React.js

- HTML5
- CSS3
- JavaScript
- Android / iOS (Basic understanding is a plus)

Backend Development

- Node.js
- Python
- AEM (Adobe Experience Manager)
- Shopify

Key Responsibilities

- Develop, test, and maintain web applications under the guidance of senior developers.
- Write clean, efficient, and maintainable code following coding best practices.
- Collaborate with cross-functional teams to deliver high-quality software solutions.
- Participate in code reviews, debugging, and performance optimization.
- Learn and implement new technologies as required by project needs.
- Assist in designing and developing features for client and internal projects.

Required Skills

- Basic understanding of programming fundamentals and software development concepts.
- Knowledge of HTML, CSS, JavaScript, and at least one programming language such as Python, Java, or JavaScript.
- Good problem-solving and analytical skills.
- Strong verbal and written communication skills.
- Quick learner with a positive attitude and willingness to adapt.
- Ability to work effectively in a collaborative team environment.

Nice to Have (Bonus Skills)

- Interest or exposure to **AI/ML tools or APIs** such as **OpenAI, LangChain, or TensorFlow**.
- Awareness of integrating **AI capabilities into web or mobile applications**, such as chatbots, recommendation systems, or intelligent automation.
- Familiarity with AI concepts including **Prompt Engineering, Embeddings, Retrieval-Augmented Generation (RAG), or Vector Databases** (e.g., Pinecone, Weaviate).
- Basic knowledge of **Python-based AI workflows**, data handling, or working with AI libraries and APIs.
- Personal projects, hackathons, internships, or contributions to GitHub/Open Source projects will be an added advantage.

What You'll Gain

- Hands-on experience working on real-world client and product development projects.
- Mentorship from experienced software engineers and technical leaders.
- Exposure to modern web technologies, cloud platforms, AI-powered development, and industry best practices.
- A collaborative, learning-focused work environment with opportunities for continuous skill development.
- Opportunity to receive a **full-time Software Development Engineer (SDE)** offer upon successful completion of the internship, based on performance and business requirements.
